

## The 2022 Digital Learning Journey on Thyroid Disorders

PODCAST

LAUNCH DATE 30 November 2022

### The global rise of thyroid cancer: true emergency or false alarm

#### OVERVIEW

The most recent epidemiological data from different countries suggests a rising incidence and incidence-based mortality of thyroid cancers, which claims for discussion with key opinion leaders to understand the causes of such increase and the possible impact of such findings in different countries, avoiding overlooking potentially fatal neoplasms, but also avoiding expensive overdiagnoses. Cost-effective diagnostic and screening strategies, as well as personalized medicine is highly desirable, especially for physicians working in developing/emerging countries. This podcast will provide a brief overview of the best practices for the diagnosis and management thyroid cancer in daily clinical practice.

#### LEARNING OBJECTIVES

- Learn the current epidemiology of thyroid cancer
- Learn the main recommendations from international guidelines for the treatment of the most frequent forms of thyroid cancers, avoiding overtreatment

#### TARGET AUDIENCE

Endocrinologists, oncologists, general practitioners and endocrine surgeons

#### FACULTY
