

The 2024 Digital Learning Journey on Growth Disorders

OVERVIEW

Growth disorders significantly impact physical, mental, and emotional health, and therefore recognition and intervention in a timely manner is crucial. Proper growth from childhood to adulthood is vital for an optimal development. The 2024 Digital Learning Journey on Growth Disorders will address educational needs of healthcare professionals (HCPs) managing such conditions and it includes a Virtual Animated Conversation and a Scribing Video, targeting diagnosis and management gaps. The aim of these scientific activities is to keep HCPs updated on the latest developments in the field, providing evidence-based and balanced scientific programs relevant to clinical practice.

LEARNING OBJECTIVES

- Identify potential pitfalls of GH provocative test
- Increase the understanding of sexual steroids priming in children with growth delay
- Update on new possibilities for diagnosis of GHD

TARGET AUDIENCE

Endocrinologists, paediatric endocrinologists, paediatricians, healthcare providers involved in the management of growth disorders
